United African Peoples Organization Black & Green Wednesday

The Ongoing Exploitation of Africa

The introduction of genetically modified crops to Africa threatens to poison agricultural workers, undermine public health, drive small farmers off the land and allow a massive transfer of wealth to western corporations. This biological imperialism is the latest wave in a pattern of exploitation of African culture that has occurred for centuries. To learn more about defending Africa's food supply, join us...

Wednesday, May 5 at 7:00 p.m.
Genesis House • 6018 Delmar Boulevard
