**G**lobal warming is already having its most devastating effects on people of color across the world. Coastal cities from New Orleans to Africa are being hit by more intense storms. Coral reefs are disappearing, making tsunamis more violent. Drought is ruining crops.

- **Henry Robertson**, Green Party of St. Louis, will explain the science of global warming and give an overview of major planetary changes likely to occur in future decades.
- **Ben Ikari**, National Union of Ogoni Students, will describe problems with oil extraction in Nigeria, including the contribution of gas flaring to global warming and increased health problems from rising temperatures. Mr. Ikari is the author of *Ken Saro-Wiwa and MOSOP: The Story and Revelation*
- **Barbara Chicherio**, Gateway Green Alliance [moderator]

# Environmental Racism & Global Warming
