Stop Energy Price-Gouging by Winning a Green-Powered Earth

The phony gas crisis and across-the-board energy theft bankrupting the nation is the product of a century-old campaign by big business to monopolize our energy supplies. We have the green technology to make every household and every business in America energy self-sufficient. But from the automobile to electric power generation to agriculture and manufacturing, the major corporations have denied us green technologies. The time to turn that around is NOW!

Our guest speaker will be Harvey Wasserman, author of SOLARTOPIA! OUR GREEN-POWERED EARTH and numerous other books on energy, the environment, US history and stolen elections. He has served as senior advisor to Greenpeace USA and edits the NukeFree.org web site.
