# Is the City of St. Louis Removing Lead from homes?

**7 pm, Wednesday, Jan 4, 2006**

Carpenter Branch Library  
3309 S. Grand, St. Louis, MO 63118

**T**he City of St. Louis claims that 3300 Nebraska is a showcase block for cleaning up lead. A survey by the Greens found no evidence of success. In October 2005, HEJ gave the City very poor marks on lead poisoning prevention. The Director of Operations has been invited to describe the City's lead programs. The forum includes:

- Don Fitz, Gateway Green Education Foundation, Green Time TV
- Kathleen Logan-Smith, Health & Environmental Justice, St. Louis
- Ron Smith, Dir. of Operations, City of St. Louis, has been invited
- Zaki Baruti, Green Party, Universal African Peoples Org [moderator]
